CAREER and TECHNICAL EDUCATION HANDBOOK

RIVERSIDE COMMUNITY COLLEGE DISTRICT

Wolde-Ab Isaac, Ph.D., Chancellor

BOARD OF TRUSTEES

- Bill Hedrick President
- Jose Alcala Vice President
- Virginia Blumenthal Secretary
- Mary Figueroa Trustee
- Keri Then Trustee

The Riverside Community College District complies with all federal and state rules and regulations and does not discriminate on the basis of ethnic group identification, national origin, religion, age, gender, gender identity, gender expression, race, color, ancestry, genetic information, sexual orientation, physical or mental disability, or any characteristic listed or defined in Section 11135 of the Government Code or any characteristic that is contained in the prohibition of hate crimes set forth in subdivision (1) of Section 422.6 of the California Penal Code, or any other status protected by law. This holds true for all students who are interested in participating in education programs and/or extracurricular school activities. Limited English speaking skills will not be a barrier to admission or participation in any programs. Harassment of any employee or student with regard to ethnic group identification, national origin, religion, age, gender, gender identity, gender expression, race, color, ancestry, genetic information, sexual orientation, physical or mental disability, or any characteristic listed or defined in Section 11135 of the Government Code or any characteristic that is contained in the prohibition of hate crimes set forth in subdivision (1) of Section 422.6 of the California Penal Code, or any other status protected by law is strictly prohibited. Inquiries regarding compliance, and/or grievance procedures may be directed to the District's Title IX Officer/Section 504/ADA Coordinator at (951) 222-8039, 3801 Market Street, Riverside, CA 92501.

Alternate formats for this material are available to individuals requiring disability accommodation. Please contact the office of Diversity, Equity and Compliance at (951) 222-8039.

Career Educated Professionals Are In Demand in Every Industry

Fast, focused career programs can lead to employment in as little as one semester. The Riverside Community College District offers virtually unlimited options for career education degrees and certificates in high-demand fields like business, healthcare, cybersecurity and IT, energy, construction, and more!

Regional job growth is expanding at nearly double the national rate.

Middle-skill jobs, which require education beyond high school but not a four-year degree, make up the largest part of the labor market in the United States!

Career education certificate holders increase their earnings by nearly 30% on average.

70% of all future jobs will require more education than a high school diploma.

Why the “Middle-Skills Job Gap” is Good for You

Middle-skill jobs are those occupations that require more education than a high school diploma, but are not a four-year degree. According to the Public Policy Institute of California, California was predicted to be facing a middle-skill job gap of up to 1.5 million workers by 2025. Not surprisingly, this gap increased due to the COVID-19 pandemic. This is especially alarming for the Inland Empire region, which is among the state’s fastest-growing, yet least-prepared economies, in terms of education and training.

While this demand poses a challenge for regional employers, it represents a huge opportunity for people looking for secure careers and great salaries. All you need is the right education to gain entry into these in-demand fields. And that’s exactly what the Riverside Community College District career education programs provide.

If you’re ready for a high-demand, high-paying career, you’ve come to the right place!

STEPS TO ENROLL

ADMISSIONS APPLICATION

Students only need to apply to **one** of the three colleges within Riverside Community College District (RCCD). The college to which you apply will be your Home College. This is where you will receive services related to assessment, counseling, and financial aid. You can still take classes at **any** of the three college sites, or online.

STEP
1

TO APPLY:

MORENO VALLEY COLLEGE (M): www.mvc.edu and click the *Apply for College* link

NORCO COLLEGE (N): www.norcocollege.edu and click the *Apply Now* link

RIVERSIDE CITY COLLEGE (R): www.rcc.edu and click the *Apply Here* link

STEP
2

ORIENTATION:

Orientation introduces you to terminology, academic programs, and student services and gives you planning tools you'll need to succeed in college. Once you apply, you will be given a RCCD student email and access to the WebAdvisor account. To access the online orientation, log on to your WebAdvisor account and click on the *Take Your Online Orientation* link under the **Academic Planning** header.

STEP
3

PLACEMENT SURVEY:

This will assist in placing you in the class best suited to your skills. As of October 2018, the placement survey is completed during the application process. You either completed this step through the admissions application or a survey that was sent to your email address. To check for your placements, login to WebAdvisor/MyPortal, go to **Academic Planning**, then click on *Placement Test Summary* to view your results. If you do not see MMAP English or MMAP math placements, go back to **Academic Planning**, then click on *Placement Survey* to complete the survey for placements.

STEP
4

ABBREVIATED STUDENT EDUCATIONAL PLAN:

MORENO VALLEY COLLEGE (M): Students connect with an educational advisor virtually or in person to create the first semester educational plan and to gain a better understanding of the courses needed for their first term. Email: movaac@mvc.edu • Text: (951) 472-2176

NORCO COLLEGE (N): Students schedule an appointment to meet with an educational advisor to create the first semester educational plan and to gain a better understanding of the placement results and courses needed. Phone: (951) 372-7176 • Email: norcoEC@norcocollege.edu

RIVERSIDE CITY COLLEGE (R): View your Abbreviated Educational Plan/Trailhead and Placement Summary under **Academic Planning** for suggested first-term courses on <https://portal.rcc.edu>.

STEP
5

COUNSELING:

Students are encouraged to meet with a counselor to receive information on which courses to take to meet their educational and career goals.

STEP
6

CAREER AND TECHNICAL EDUCATION ENGAGEMENT CENTERS:

Students are encouraged to visit the engagement centers on their selected campus to get assistance from educational advisors and support team.

Note: Make sure to activate your student email address. This is how the college will communicate important information and updates including registration date, available courses, schedule changes, waitlist status, and more.

APPRENTICESHIPS

Apprenticeships are an effective approach for assisting students with knowledge and skills needed in the area of study. There are a number of positives when choosing whether to participate in an apprenticeship, such as a career exploration, strengthening your professionalism, resume building, and improving classroom performance. Apprenticeships also allow students to earn while they learn while experiencing the rigors of their chosen field of study. At the conclusion of an apprenticeship, the student will have developed industry needed qualifications which can lead to improved employability upon graduation. An apprenticeship is all about transferring a student's skillset from the classroom to industry.

WHAT IS AN APPRENTICE?

Apprentices learn the skills of an occupation while earning a paycheck and completing on-the-job training combined with related instruction.

HOW DO I GET STARTED?

Apprenticeship programs are run by different entities. Some individual companies run internal apprenticeship programs and other times trade unions and employer associations sponsor apprenticeship programs and work with large employer groups.

The best method for getting started is to begin researching programs in occupations you are interested in pursuing. You can use the state's database of approved apprenticeship programs to find contact information for programs available in your area at www.dir.ca.gov/databases/das/aigstart.asp.

Norco College works with apprenticeship programs in the region and can assist you with getting information on the occupations and programs in your area.

Riverside City College currently offers apprenticeship programs in the following occupations:

Automotive:¹

Automotive Service Tech and Mechanic

Culinary:²

Cook

Pastry Cook

Early Childhood Education:¹

Teacher

Master Teacher

School Site Supervisor

Healthcare:¹

CNA to LVN (Licensed Vocational Nurse)

LVN to RN (Registered Nurse)

Information Technology:¹

Cyber Security Support Technician

Information Technology Specialist

Moreno Valley College also offers apprenticeships in the above Information Technologies as well as Cyber Security Healthcare Specialist.

The students will be taking courses to achieve a certificate and/or degree in their chosen pathway while being employed as an apprentice with a local apprenticeship employer partner. Their tuition is waived, and their apprenticeship is registered with the Division of Apprenticeship Standards for the State of California and the U. S. Department of Labor. They will receive an apprenticeship from each upon completion of the apprenticeship program.

¹ These apprenticeship programs are competency based and are completed when registered courses are completed and registered skills competencies are met.

² The Culinary Apprenticeship program is registered with the Division of Apprenticeship Standards for the State of California and the American Culinary Foundation. This apprenticeship program is time based. The standard is 4000 hours, 10 stations for Cook and 5 stations for Pastry Cook.

ARTS, MEDIA and ENTERTAINMENT

The days of working in the arts and being a “starving artist” are over. Entertainment, especially in California, is big business. According to PricewaterhouseCoopers, the U.S. media and entertainment market is projected to grow to \$825 billion by 2023, making it the largest media and entertainment market in the world. As the future of media continues to merge with new and emerging technologies, the demand for technologically savvy designers and creative professionals will continue to grow.

Unlike other career pathways, jobs in the Arts, Media, and Entertainment sector tend to be cross-disciplinary, demanding a constantly changing combination of imaginative and hands-on skills. Students in this sector generally study across a mix of several different academic disciplines, in order to acquire a mix of technical and creative skills, as well as the ability to work both independently and collaboratively.

BUILDING and CONSTRUCTION TRADES

The United States is not only one of the world's leading suppliers of energy, it is also one of its largest consumers. To serve this ever-expanding market, the Building and Construction Trades sector employs technicians in electrical, mechanical, and construction jobs as well as architects, engineers, business managers, sales/marketing professionals, and public policy specialists.

With the increase of public and governmental interest in renewable energy, clean energy generation, and energy efficiency, job opportunities across the energy spectrum are growing rapidly and will continue to do so, especially since 40% of the existing workforce will be eligible for retirement in the next five years. As a result, employers will need skilled workers for traditional energy jobs as well as future energy-related positions. While this sector consists of many different kinds of companies and products, skills developed in one area are generally transferable to others.

In California alone, this sector accounted for seven percent of all new job growth, according to the 2019 Energy Employment Report. These opportunities boast high salaries, with construction laborers averaging \$47,190 per year and managers drawing more than \$110,000. Especially strong demand is projected for heating, ventilation, and air conditioning (HVAC) technicians, electricians, plumbers and pipefitters, utility workers, engineers, and a wide range of business professionals. According to some estimates, jobs in the energy and the environment sector could triple over the next decade.

TYPES OF CAREERS

- Electronic Technician
- Maintenance Supervisor
- Heating/Ventilation/AC (HVAC) Technician
- Electrician
- Construction Supervisor
- Computerized Numerical Control (CNC) Technician
- Computer-Aided Design (CAD) Technician
- Building Contractor
- Automotive Control System Technician
- Solar Technician
- Sub-Contractor

SALARY SNAPSHOT

- Carpenters \$49,525 / \$23.81 hourly
- First-Line Supervisors of Construction Trades & Extraction Workers \$63,814 / \$30.68 hourly
- Plumbers, Pipefitters & Steamfitters \$54,912 / \$26.40 hourly
- Construction Managers \$71,406 / \$34.33 hourly

BUSINESS ADMINISTRATION

Who says more money means more problems? The Business Administration industry sector is a critical component of the U.S. economy and employs more than 8 million people in careers ranging from book-keeping to financial and investment planning. Advances in technology as well as market globalization and the expansion of banking and investment institutions around the world will continue to create exciting and challenging career opportunities in this industry for the foreseeable future.

With more than \$21.8 trillion in assets, the U.S. banking system supports the world's largest economy, but students who study business and finance don't just work for banks. Career opportunities for those with degrees related to business and finance are available in every sector of the economy and tend to require specific skills in mathematics, organization, time management, customer service, and communication.

Specializations typically emphasize accounting and finance concepts as they relate to international business, computer applications, taxes, investments, and business management.

EDUCATION, CHILD DEVELOPMENT, and FAMILY SERVICES

If you are looking for a fulfilling career that makes a positive difference in the lives of children and adults, you might consider a job in the Education, Child Development, and Family Services sector. Professionals who follow this path tend to be good communicators with the ability to empathize with people from diverse backgrounds.

As populations increase and older teachers retire, this area will continue to be one of the fastest-growing industry sectors in the nation despite the limits that state and local budgets often put on its growth.

According to the U.S. Department of Labor, enrollment in all grades, from preschool to college, will continue to grow, which means that teachers of all levels will be needed to meet the demand. Among the fastest-growing segments of this industry sector are childcare services; individual, family, community, and vocational rehabilitation services; and community and residential elder care services.

ENERGY, ENVIRONMENT, and UTILITIES

The United States is not only one of the world's leading suppliers of energy, it is also one of its largest consumers. To serve this ever-expanding market, the Energy, Environment, and Utilities sector employs technicians in electrical, mechanical, and construction jobs as well as architects, engineers, business managers, sales/marketing professionals, and public policy specialists.

With the increase of public and governmental interest in renewable energy, clean energy generation, and energy efficiency, job opportunities across the energy spectrum are growing rapidly and will continue to do so, especially since 40% of the existing workforce will be eligible for retirement in the next five years. As a result, employers will need skilled workers for traditional energy jobs as well as future energy-related positions. While this sector consists of many different kinds of companies and products, skills developed in one area are generally transferable to others.

In California alone, this sector creates 15,000 jobs per year, many of which are for high-wage jobs, starting at \$40,000 and progressing to more than \$100,000. Especially strong demand is projected for Heating, Ventilation, and Air Conditioning (HVAC) technicians, electricians, plumbers and pipefitters, utility workers, engineers, and a wide range of business professionals. According to some estimates, jobs in the energy and environment sector could triple over the next decade.

TYPES OF CAREERS

- Electronic Technician
- Maintenance Supervisor
- Heating/Ventilation/AC (HVAC) Technician
- Electrician
- Construction Supervisor
- Computerized Numerical Control (CNC) Technician
- Computer-Aided Design (CAD) Technician
- Building Contractor
- Automotive Control System Technician
- Solar Technician
- Sub-Contractor

SALARY SNAPSHOT

- Carpenters \$49,525 / \$23.81 hourly
- First-Line Supervisors of Construction Trades and Extraction Workers \$63,814 / \$30.68 hourly
- Plumbers, Pipefitters & Steamfitters \$54,912 / \$26.40 hourly
- Construction Managers \$71,406 / \$34.33 hourly
- Operating Engineers & Other Construction Equipment Operators \$76,253 / \$36.66 hourly
- Heating, Air Conditioning & Refrigeration Mechanics and Installers \$47,424 / \$22.80 hourly
- Structural Iron & Steelworkers \$69,618 / \$33.47 hourly
- Construction & Building Inspectors \$82,077 / \$39.46 hourly
- Sheet Metal Workers \$56,680 / \$27.25 hourly
- Water & Wastewater Treatment Plant & Systems Operators \$71,323 / \$34.29 hourly
- Electricians \$49,878 / \$23.98 hourly

- Construction Technology/Management, Building Construction
- Electrician, Electrician Apprentice, General/Basic
- Electrician
- Heating, Ventilation, Air Conditioning & Refrigeration
- Plumbing
- Residential Maintenance
- Woodworking
- Land Surveying

FUN FACT:

California has set the goal that by the year 2030, 50% of the state's buildings will consume zero net energy. This challenge can only be met with a highly skilled workforce.

ENGINEERING and ARCHITECTURE

The world's future will be shaped by ideas that are developed by those working in the Engineering and Architecture industry. Do you want to play a role in helping to create the world of tomorrow? If you answered yes, then consider a career in this field. Jobs in this industry include CAD/CAM technicians, software engineers, architects, surveyors, and mechanical drafting. Check out our programs in Architecture, Drafting Technology and Engineering Technology.

TYPES OF CAREERS

- Civil Drafters
- Surveying Technicians (same as Mapping Tech)
- Electro-Mechanical Technicians (in ICT)
- Power Distributors and Dispatchers
- Nuclear Technicians
- Mapping Technicians (same as Survey Tech)

SALARY SNAPSHOT

- Civil Drafters: \$27.24 hourly
- Surveying Technicians: \$28.08 hourly
- Electro-Mechanical Technicians: \$30.99 hourly
- Power Distributors & Dispatchers: \$45.90 hourly
- Nuclear Technicians: \$43.85 hourly

HEALTH SCIENCE and MEDICAL TECHNOLOGY

The medical and health-related industry is one of the largest employers in California, employing nearly 1.7 million professionals across a wide range of well-paying career opportunities. Employment in healthcare occupations is projected to grow at a rate of 15% from 2019 to 2029, adding more jobs than any other occupational groups and maintaining its position as one of the top five grossing industries in the United States.

Programs of study in this sector can lead you in many different directions, including nursing, biotechnology research, diagnostic services, health informatics, support services, and physical therapy. While many of the careers in this sector require advanced-level preparation, there are many options available for students of various aptitudes, interests, abilities, and degree levels.

While significant expansion will continue across all occupational segments, the Health Workforce Initiative notes especially high growth opportunities for certified nursing assistants, home health aides, and licensed vocational nurses.

TYPES OF CAREERS

- Certified Nursing Assistant (CNA)
- Pharmacy Technician
- Registered Nurse (2 year)
- Paramedic
- Operating Room Technician
- Medical Records Technician
- Emergency Medical Technician (EMT)
- Licensed Vocational Nurse (LVN)
- Radiology Technologist
- Dental Lab Technician

HOSPITALITY, TOURISM, and RECREATION

The travel and tourism market is one of the world's largest industries, with a global economic impact of over \$9 trillion U.S. in 2019. In the U.S. alone, this industry supports nearly 9 million jobs. Whether you have a passion for food, travel, sports or nutrition, California's unique position as premier travel destination makes this an exciting sector to be a part of.

Certificate and associate degrees available in Retail, Hospitality, Tourism, and Recreation Management are not only transferable to related CSU and UC programs, but will also qualify you for many immediate employment opportunities. Since many of these sectors depend on the work of part-time employees, opportunities abound for students who want to gain valuable work experience while earning a paycheck and going to school. As a bonus, these jobs often offer unique travel options and industry discounts.

INFORMATION and COMMUNICATION TECHNOLOGIES

More than a quarter of the \$7.85 trillion global information and communication technology market resides in the United States, where it has created upwards of 12.4 million jobs. In California alone, where Silicon Valley has become synonymous with the rapidly evolving world of technology, this industry accounts for 10.3% of the state's economy while providing more than 1 million jobs across the state.

Information and communication technology students learn about the design, development, maintenance, and management of hardware, software, multimedia, and systems integration services. Because of the central role that technology plays in all industries, IT professionals are and will continue to be in great demand in every sector of the economy. Specific areas of future growth are likely to be in the areas of cloud computing, the collection and storage of big data, and information security.

MANUFACTURING and PRODUCT DEVELOPMENT

With an estimated 125,930 annual job openings, but only 5,565 graduates to fill them, manufacturing and product development remains a promising sector for those who like to work with their minds and hands. While certain kinds of manufacturing jobs are in decline, high-tech manufacturing continues to grow, especially in the areas of 3D printing and high-speed, computerized numerical control machining.

Employers in this sector look for technicians who are at ease in the mechanical world and able to apply scientific and technical principles to manufacturing processes. Students of manufacturing and product development learn about manufacturing processes and systems, and can follow a wide variety of paths, including graphic design production, machine tooling and forming, welding and materials joining, and product innovation and design.

Opportunities for advancement are plentiful, as technological advancements make higher-skill jobs in basic research and technology development, product and process engineering and design, operations and maintenance, transportation, testing, and lab work become more prevalent.

MARKETING, SALES, and SERVICES

Thanks to the internet, companies sell their products globally. With so many products on the market, companies will need salespeople and marketing to get the job done. If you think you would be good at selling the merits of a product, then you should consider a career in Marketing, Sales and Service. Jobs in this industry include sales managers, marketing directors, insurance sales agents, real estate agents, and advertising executives. Check out our programs in Business Administration – with a concentration in Marketing and Real Estate.

PUBLIC SERVICES

A public service is one that is provided by the government for the benefit of its citizens. Generally speaking, “government jobs” are highly prized because of their benefits and retirement packages, and they encompass working in everything from public safety and emergency response to community outreach and vocational counseling. Students who want to make a difference in their communities by serving the public’s interest should consider working in this sector.

Because jobs in this sector offer some of the best benefits and retirement packages available, their job markets are highly competitive. As a result, students will generally find more opportunity and less competition for these jobs in their local communities.

TRANSPORTATION

Whether it's scooters or jet airplanes, the Transportation sector plays a crucial role in our "on-the-move" world by making sure people and products get from one place to another. As vehicle components and repair techniques become increasingly sophisticated, the Transportation sector will continue to provide highly transferable employment opportunities in a wide range of related occupations.

When you think about the role that transportation plays in all of our personal and professional lives, it's obvious why transportation professionals are so important. Students who have good "mechanical" minds and enjoy working with their hands can choose from three main career pathways: Collision Repair and Refinishing; Vehicle Maintenance, Service and Repair, and Logistics.

Areas of projected market growth include the use of Global Positioning Systems (GPS) and Radio Frequency Identification (RFID), developments in rocket technology, super-capacity jet airplanes, hybrid and hydrogen fuel-cell technology, and the use of biodiesel and other alternative fuels.

NONCREDIT/ EXTENDED LEARNING

About RCCD Extended Learning

The Extended Learning programs at Moreno Valley College, Norco College and Riverside City College offer noncredit, tuition-free courses. Whether you are looking to gain professional expertise to expand your career opportunities or grow your business, learn foundational skills to enter a CTE pathway or augment your educational experience while taking credit courses, Extended Learning programs provide a pathway to success!

HOW TO REGISTER

Step 1: Choose the classes you would like to take. Any updates to the class schedule will be noted on the Extended Learning website at <https://extendedlearning.rccd.edu/scheduleapp/Pages/default.aspx>. Please see the official college course schedule as course time and days are subject to change.

Step 2: Visit the “Get Started” page under the Extended Learning website for step-by-step instructions on how to register using MyPortal or EduNav.

After completing the free application to one of the colleges through CCC Apply, you must wait one to two business days to receive your official welcome email with your MyPortal login information. The email will contain your RCCD student ID number, which is needed to login to your MyPortal account. All students register for both noncredit and credit courses in MyPortal or EduNav. Students that apply to one college, can take classes at all three colleges in the Riverside Community College District. Please apply at least three weeks before the class starts.

WANT MORE INFORMATION?

Virtual information session dates are listed on the Get Started page. For additional information, please visit the RCCD Extended Learning website or email extlearning@rccd.edu.

NONCREDIT FREQUENTLY ASKED QUESTIONS (FAQS)

What are noncredit courses?

Noncredit courses are designed for students interested in pursuing personal, professional or academic goals. Noncredit courses focus on helping students build specific skills that are necessary for reaching their individual goals. All courses are taught by college faculty.

Who can take noncredit courses?

Any community member 18 years or older can take noncredit courses. Those under 18 must complete a concurrent enrollment form and return it to the college's Admissions and Records office. Please contact extlearning@rccd.edu for more information.

How much does it cost to enroll in a noncredit course?

All noncredit courses are tuition free, though students may have to pay for books. All students who park on campus must purchase a parking pass. Since noncredit courses are tuition free, financial aid is not available for these courses.

How long will it take to earn a certificate?

The time it takes to complete a certificate varies. Visit the Courses and Certificates pages on the Extended Learning website to learn more. Students can also make an appointment with an educational advisor or college counselor. Email extlearning@rccd.edu to get connected.

For additional frequently asked questions (FAQs), visit the About Noncredit page under the Extended Learning website about residency, how to sign up, and more!
